EXPRESSION OF INTEREST: PREQUALIFICATION OF VENDORS FOR SUPPLY OF GOODS & SERVICES

MediPool Group Purchasing Organization (GPO) is a healthcare reform initiative designed to aggregate pharmaceutical demand across Nigeria's public and private health institutions. By pooling orders at scale, MediPool aims to achieve significant cost savings, enhance the availability of essential medicines, and promote consistent quality across the supply chain. This model not only reduces medicine costs for healthcare providers and patients but also strengthens procurement transparency, supplier accountability, and overall health system resilience.
