

“34/NRC-NAT/NG/2025” - CONSULTANCY - NGO HUB TECHNOLOGY (WEBSITE/SOFTWARE) DEVELOPER

The NIF/PLRCAP initiative, hosted by NRC, is seeking an experienced technology (website/software) developer firm or individual with expertise in one or all the following: Learning dashboards as well as mobile website development and Artificial Intelligence (A.I) to lead the website upgrade and development process for the NGO Support Hub.

The technology developer will work closely with the PLRCAP and NRC teams to actualize and deliver on a defined set of objectives for upgrading the existing website. This includes adding new features, enhancing the functionality of the current platform, and improving the overall user experience. The developer will translate these objectives into business and functional requirements, identify cost-effective and scalable open-source solutions, build and test the upgraded website along with its new suite of digital tools, and provide training and knowledge transfer to administrative/backend users to ensure seamless maintenance and operation of the platform and its components.
